٦١

DETAILED ACTION

Page 2

The application, filed March 29, 2001, has been examined, and Claims 1-15 are pending. The objections and rejections are as stated below.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

With regard to Claims 11-15, the claimed invention is directed to non-statutory subject matter. Whether a claimed invention relating to business methods is directed to statutory subject matter is governed by State Street Bank & Trust Co. v. Signature Financial Group Inc., 149 F. 3d 1368, 1374, 47 USPQ2d 1596, 1601-02 (Fed. Cir. 1998). Pursuant to the holding in this case, computer claims should be treated like any other process claims (MPEP § 2106). Claims 11-15 relate to a "proxy agent" comprising various characteristics. The claims are on their face non-statutory, as a "proxy agent" is not a process nor is it a machine, manufacture of composition of matter. The examiner believes that Applicant may intend the "agent" to represent a computer system for implementation of the method, but this should be claimed as such.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section Application/Control Number: 09/821,106 Page 3

Art Unit: 3624

351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2 are rejected under 35 U.S.C. §102 as being anticipated by Montgomery, U.S. Patent Application Publication #20020038282.

With regard to Claims 1,6,11, Montgomery teaches the method, medium an agent comprising:

providing a bid parameter set, having one or more proxy bid parameters (Paras. 20,62)

said proxy bid parameters indicating proxy conditions for at least one offering or auction to which proxy bidding is to be made; (Para. 62)

checking at least one current bid level in a bid data store of an offering or auction system; (Figure 11, Item 1104)

determining if any of said proxy conditions have been met; (Paras. 20,62; Figure 11, 1106; Claim 1[f])

and placing a counter bid into at least one auction responsive to said proxy conditions being met. (Claim 1[g])

With regard to Claims 2,7,12, Montgomery teaches the method medium and agent comprising:

determining if said current bid level is below an indicated bid maximum parameter in said proxy bid parameters. (Figure 11, Items 1104-1106)

With regard to Claims 3,8,13, Montgomery does not appear to expressly disclose the method medium and agent comprising:

determining if a specified time during an auction open period has not been reached yet such that a specified maximum bid may be placed before such specified time. (Paras. 20, 62; Claims 1[f-g])

With regard to Claims 4,9,14, Montgomery teaches the method medium and agent comprising:

Application/Control Number: 09/821,106 Page 4

Art Unit: 3624

determining if a specified time prior to an auction close time has been reached such that

a specified maximum bid may be placed after such specified time.

(Para. 20, Claims 1[f-g])

With regard to Claims 5,10,15, Montgomery teaches the method medium and

agent comprising:

determining if a minimum amount of time has elapsed since said current bid was

placed. (Paras. 20, 62)

Conclusion

THIS ACTION IS NON-FINAL. Any inquiry concerning this communication or

earlier communications from the examiner should be directed to James Alpert

whose telephone number is (571) 272-6738. The examiner can normally be reached

on M-F 9:30-6:00. If attempts to reach the examiner by telephone are unsuccessful, the

examiner's supervisor, Vincent Millin can be reached on (571) 272-6747. The fax phone

number for the organization where this application or proceeding is assigned is

(571) 273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for published

applications may be obtained from either Private PAIR or Public PAIR. Status

information for unpublished applications is available through Private PAIR only. For

more information about the PAIR system, see http://pair-direct.uspto.gov. Should you

have questions on access to the Private PAIR system, contact the Electronic Business

Center (EBC) at 866-217-9197.
